Software

Our award-winning suite of software has helped our customers achieve transformational business outcomes powered by remarkable ROI.

HuLoop is an AI-powered, no-code hyperautomation platform that enables enterprises to maximize productivity and optimize human capital. It's an all-in-one platform for Business Process Automation (BPA), Robotic Process Automation (RPA), Intelligent Document Processing (IDP), Intelligent Data Automation (IDA), and Software Test Automation (STA).

Cogent, an award-winning debt collection and litigation management software, leads the industry with its advanced capabilities tailored to modern collection practices and regulatory compliance. Trusted by top debt collection agencies and law firms, It supports compliance with FDCPA, CFPB, and Reg F regulations through a robust rules engine.

AgreeYa's generative AI powered Chatbot provides organizations with self-service and interactive way of answering employee queries. It has helped many organizations in improving adoption of new technologies/solutions, establishing governance, driving automation, while reducing cost of operation.

QuickApps is an innovative 'No-code' solution with a set of pre-built templates and 21 powerful web apps that enables organizations to easily build or customize complex business applications on SharePoint ,On-premises or online up to 80% faster.

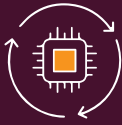

Recovery Manager is an ingenious recovery solution for SharePoint for a complete SharePoint farm restore and item-level granular recovery of individual documents, lists, document libraries, sites, and workspaces.

Site Administrator enables centralized administration and control of SharePoint servers and sites, to make enterprise-wide changes to server and site policies while implementing global policy management.

Solutions

Our future-proof and highly scalable solutions are designed to help enterprises achieve more through resource and technology optimization.

Digital Transformation

Our digital transformation offerings utilize key business KPIs to drive rapid innovation. Our digital transformation stack includes Smart Analytics, Hyperautomation, Modern Workplace, Enterprise Mobility, and App Modernization.

Hyperautomation

Improve customer engagement and operational excellence with Hyperautomation. Our suite of AgreeYa's Hyperautomation offerings, solutions include Robotic Process Automation, Low Code Automation, No Code Automation, Test Automation, AI/ML.

Business Intelligence and Data Analytics

Our smart and leading-edge BI solutions help enterprises transform their data into actionable intelligence thereby assisting them in making informed strategic and tactical business decisions.

Enterprise Mobility

Adapt to the changing technology landscape and connect your business, customers and employees wherever they are with AgreeYa's enterprise mobility solutions. Our solutions include community-based, productivity, collaboration, IoT apps, etc.

Cloud & Infrastructure

Enhances performance by planning, building, and managing a cloud eco-system in a simple, secure, and unified way. We focus on security and scalability to help you achieve measurable success with your cloud transformation.

Modern Workplace & Collaboration

Foster productivity, engagement, and collaboration among employees by leveraging modern technologies. Our services include the deployment & management of Microsoft 365, SharePoint, Teams, and other collaboration tools.

Services

Our deep technology knowledge and rich industry expertise have helped us deliver services that help enterprises increase flexibility and productivity.

Microsoft Services

As a Microsoft Solution Partner, we leverage Microsoft technologies to enable global organizations to transform digitally. With our end-to-end Microsoft services, organizations can become smarter and drive growth with profitability.

Quality Engineering & Testing

Our next-gen advisory, quality engineering, digital assurance, enterprise application testing, managed testing, and test automation as services offerings enable world-class quality standards, faster, structured, and more efficient testing outcomes in the changing product and application environments.

Application Development & Management

By leveraging APIs, cloud technology, analytics, Microservices, and DevOps, our top-notch application development and modernization services facilitate digital transformation within the industry.

Software Product Engineering

We help forward thinking companies transform their software development ideas into market realities by solving complex engineering challenges with our highly advanced services and revolutionary engagement model.

Managed Services

We manage and deliver outcome-driven services on a long-term and ongoing basis in the areas of application development and management, product engineering and management, cloud and infrastructure management, end-user management, and Microsoft 365 managed service.

Customer Experience and Web Design

Build differentiated and unforgettable customer experiences. Our customer experience capabilities include the following designs – cross channel customer experience, offline user experience, web experience, mobility experience and unified enterprise experience.

Staff Augmentation

AgreeYa's staff augmentation unit provides full service staffing solutions. We are committed to delivering top talent to our clients quickly and cost-effectively more than 2 decades now.

Our success stories

Revolutionizing ADA compliance tracking for a government agency

Challenge: Faced with over 18,000 ADA issues across 900 facilities, a government agency aimed to annually resolve 10%, necessitating a robust solution for tracking, managing, and reporting the complex, multi-year task.

Solution: AgreeYa crafted a leading-edge ADA facility tracking app, leveraging Microsoft 365 tools, ensuring optimal performance. The app streamlined database structure, UI/UX elements, and reporting, providing stakeholders with efficient, real-time issue tracking and management capabilities.

Results: Hundreds of hours saved annually. Power BI cut reporting time by 61%, data processing improved by 72%, and automated alerts boosted process productivity by 36%. Significant cost savings and enhanced Microsoft 365 investment.

AgreeYa's data mesh architecture revolutionizes retail price optimization.

Challenge: Facing data integration and SQL scalability issues, our customer needed a modernized solution. High costs, instability, and inconsistent data processing posed serious challenges for their retail price optimization software.

Solution: AgreeYa implemented a robust Data Mesh on GCP, streamlining data processes. Cloud Run, Connectors, BigQuery, and SQL optimized data flow were leveraged, ensuring modular, scalable, and efficient workflows.

Results: Significant gains include a 30% cut in storage costs, 50% faster processing, and 15% improved decision accuracy. Enhanced security, collaboration, and accessibility delivered a 50% reduction in data management costs and a 40% cut in infrastructure costs.

A recruitment services giant resolved hiring challenges around time and effort; saved cost by 20%.

Challenge: A global human capital solutions company was facing multiple hiring challenges like candidate backout, compensation budget issue, etc.

Solution: We set up a team of recruiters to successfully execute the hiring drive. They sourced the profiles from various channels i.e. bench resources, job portals, job postings & headhunting to close those positions quickly.

Result: Our expert recruitment team controlled issues around compensation, candidate backout and overall improved the turn-around time for closing the open positions along with saving in recruitment costs by 20%.
